

# foundry10

## Summer College Intern (Part Time)

This summer, foundry10 is looking for a college intern to join our team. Our internship program includes both work on foundry10 business, but also lots of opportunity for interns to explore their own passion areas and interests. In addition to joining in our work to better understand learning, you will be encouraged to pitch and run your own project based on questions and ideas you have. Your project could involve drama, VR, robotics, film/photography, game design, dance and movement, or something else that interests you.

Included with your resume, please submit a written summary of how you could contribute to our organization, how you would benefit from this experience, and in what ways we could help propel you forward with your future plans. If you have an idea for a project, tell us about the question you would like to answer, how you would do it, and what you would need. Finally, tell us about what subjects you would like to focus on, although the internship will likely span many different interest areas.

This position is for 20 hours per week, from June through August at a rate of \$15/hr.

Foundry10 is a privately funded organization focused on researching learning, specifically through non-traditional learning methods. Part of our vision is to show and express what learning can look like outside the traditional classroom setting.

### Responsibilities

- Collaborate with teammates in designing and executing educational programs and studies.
- Attend and help out at events that go on throughout the summer.
- Assist with the writing and sharing of foundry10 work and findings.
- If applicable, design and execute own research and/or projects.
- Actively engage in conversations and brainstorming.

### Qualifications

- Excellent communication skills.
- Proficiency in Microsoft Office and Google Docs.
- Ability to work well independently, flexibly, and in a collaborative team environment.
- Ability to support a variety of staff and projects at a time.
- Previous experience with jobs and/or internships.

If you would like to be a part of a growing, innovative company, submit your cover letter, portfolio, resume, and project idea (if applicable) to [jobs@foundry10.org](mailto:jobs@foundry10.org). The deadline for submission is April 15<sup>th</sup> at 11:59pm.
