## Web Developer/Designer

Are you a web developer looking for a broad array of diverse challenges ranging from designing and implementing new pages to creating interactive and data-centric experiences? Do you want to work at an organization that is driven by curiosity and inquiry, and dedicated to improving learning for students all over the world? Foundry10 is looking for a web developer who can join us and help us develop our methods of communication online.

As a research organization, we are constantly seeking new ways to share our findings and get our message out to as many people as possible. This role would be to help us with conceptualizing and creating these new sharing methods, measuring and evaluating the results, and continuing to evolve how foundry10 communicates. More specifically, this role will include working both on the structure and strategy of our web presence as well as creating new and engaging forms of content that we have not yet been able to create.

Foundry10 is an educational research organization located in the Wallingford neighborhood in Seattle. We are a dynamic organization with programs and partnerships designed to serve students in pursuing their passions and expand the concept of learning. This position is full-time and offers competitive salary, benefits, and vacation time.

### Responsibilities

- Collaborate with teams to find best methods of communicating findings.
- Streamline design of website based to optimize user flow based on analytics data and implement changes.
- Attend and staff events.
- Maintain website with updates as needed by teams.
- Work with team to design and develop interactive experiences on-site that clearly communicate findings.
- Additional responsibilities dependent on your research topics and goals.
- Design and run user tests to inform evolution of site design.

### Qualifications

- Experience working on creative web design and development projects.
- Excellent communication skills.
- Proficiency with Javascript, PHP, HTML, and CSS.
- Experience building interactive experiences online.
- Experience with Google Analytics or similar tool.
- Ability to work well independently, flexibly, and in a collaborative team environment.
- Ability to support a variety of staff and projects at a time.

If you would like to be a part of a growing, innovative company, submit your cover letter, portfolio, and resume to [jobs@foundry10.org](mailto:jobs@foundry10.org).
